

Bio-Well Basic Level seminar program

1. Introduction

- a. History of EPI/GDV method – from Lichtenberg figures to Kirlian effect and to Bio-Well scanner.
- b. Different types of EPI/GDV devices. Difference between Bio-Well and GDV Camera.
- c. EPI/GDV terminology: what we measure with the use of EPI/GDV devices. It is not aura. What are EP Images? EPI is not medical diagnosis.
- d. Bio-Well certificates and EPI patents.
- e. Academic papers in per-reviewed journals on EPI/GDV technology.
- f. Safety measures.
- g. Registering account and activating subscription at www.bio-well.co
- h. Tour around www.bio-well.com and Bio-Well Forum.
- i. Software download and installation. Possible problems on MAC and Windows.

2. Main principles of working with the Bio-Well device

- a. Using the manuals and standard instructions. Overview.
- b. Preparing the device: Cleaning the electrode. How often?
- c. Preparing the device: Calibration procedure: How to do? How often to repeat? Main sense of calibration. PRACTICE
- d. Preparing the client: How to capture human fingers correctly. Fingers positioning. Wet/hot fingers. What to ask person before scanning fingertips? Medical precautions. Long nails issue. PRACTICE + “CHEAT AN EXPERT” GAME
- e. Scanning a person: standard procedure. PRACTICE
- f. Measurements with filter. PRACTICE

3. Working with Bio-Well software

- a. How to install the software update?
- b. Online and offline mode of capturing data. Uploading offline captures. PRACTICE
- c. Software interface – function of each available button.
- d. Different regimes of capturing data – Full Scan, After Scan, Stress Test, Environment mode, Meditation mode.
- e. Working with your database of clients and experiments: main rules and functions.
- f. Data exchange in Bio-Well. PRACTICE
- g. BioCor functions and Chakra’s music.
- h. Comparing the scans. PRACTICE
- i. Practical demonstration of each mode of measurement (with all types of electrodes).

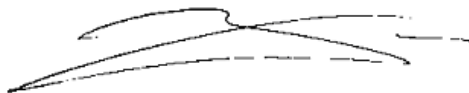

4. Basic interpretation of the obtained data: Step-By-Step

- a. Tab-By-Tab analysis: from integral parameters to sector structural analysis.
- b. Main problematic sectors on fingers of the modern people.
- c. What to comment and not comment to a patient.
- d. Functional analysis of the data: possible conclusions.
- e. Psychosomatic approach: Chakra's interpretation.

5. Final Test: applying for the Basic Level User Certification
