

## **“The Reality of Invisible”**

Kirlianographies of Sofia Blank, a researcher and author of 3 books, a member of the World Union of Writers and USA coordinator at НДЭАМ (NSEWA – World’s Assembly).  
Tel: (718) 946-0758, Email: micvic11@gmail.com

Dear Teachers, friends, parents and grandparents!

The invisible world surrounding us, although not seen by the physical eye of a human being, constantly interacts with us.

Depending upon the type of an energy-charge within each and every one of us, we attract and gravitate towards either positive – “angelic” – energies, or “demonic” ones from the lowest astrals.

The type of a charge in energy on the photos is determined by a dowsing method.

No doubt, you’ve heard about the “invisible world”, but have you ever had a chance to see actual documents confirming the reality of interaction between the beings of these invisible worlds and men, animals, plants, crystals etc.?

The photos presented below, show what occurs within aura, a space near the bio-field and physical body of a human being at a different moments in life and during the experiments.

You can find more in-depth information in her books and the album of Kirlianographies of Sofia Blank, it is also available in a film on the website:

[www.youtube.com/watch?v=-9bQHHjnC-c](http://www.youtube.com/watch?v=-9bQHHjnC-c)

Kirlian photos – a special kind of photography that captures a bio-field, also known as aura – allow us to see and document changes taking place within auras. This technique is well established, acclaimed and widely used in various scientific researches all over the world.

Special attention must be paid to understanding that a child’s aura, in its early stages, is very weak and vulnerable to all harmful influences. Pictures taken of a child’s aura often show a weak, sometimes a bare contour of a disconnected/punctured aura with gaps in it. Through these gaps a drainage of positive energy occurs, allowing negative energies to flow in and embed themselves into the aura, destabilizing child’s behavior and, hence, the life.

Inadequacy in children’s behavior usually causes worries and anxiety in adults, who turn to modern medicine for help. But in most cases, the reason/s for these inadequacies are due to lack of protection in children’s auras and parent’s/teacher’s inability to understand and respond properly to correct such behavior.

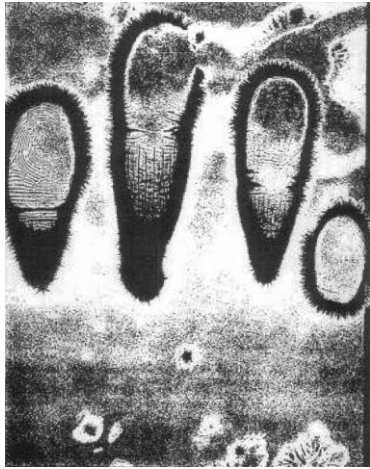

What must be done in these situations? – Practice the defense of child’s aura!

How? – Pray, make an appeal to the DIVINE for help.

Why? – Because a thought is material and Forces of Light respond to you by sending positive energies and creating a field of protection around the child and you, as a conductor of energy. Fear not – OUR FATHER and FORCES OF LIGHT always send positive energies into the child’s and yours auras in response to your call for help and protection.

You will find a confirmation of what is stated here in the enclosed Kirlian photos and comments about them. Please, take your time to get familiar with this information – it will help you make a better, more intelligent choices to correct your child’s behavior in a day-to-day situations.

Kirlianography gives us an opportunity to learn about invisible worlds through photo-documents and gives us a chance to explore the unknown forms of invisible life. The data obtained, helps us create a comprehensive insight on different energy-forms of life surrounding and interacting with our world.

## Comments to Kirlian Photos

1. Jeanne, 50 years old. Her first shot shows a bare contour, punctured aura. Complains of depression and chronic fatigue. Submitted photo was taken after the first treatment session with Sofia, which included Sofia and Jeanne prayers to God, Mother of God, angels, prophets and saints. Here is a negative of the shot. In the photo, positive – angelic – substance: on the top, over a reconnected aura, appeared positive substances, like a bird, resembling a seagull, right at the top – a contour of a noble woman’s face; at the bottom – intricate formations that look like flowers. There is a bright glow of aura around the fingers; fingerprint lines glowing inside. This image reflects a transformation of aura from barely visible to bright and rich.

2. Levon, 54 years old. After prayers for the loved ones, the light beings, reminding the wings of birds, entered/appeared in his aura.

3. Gregory, 35. Frame I – initial, the aura is irregular and fragmented.

Frames II, III and IV made after the prayers in different religions. Aura has gained completeness, brightness, density and radiance. Large positive-energy formations came after prayers.

4. In Frame IV angelic, a strong positive substance in the form of a large radiant star appeared in Edward’s aura, after five people prayed “Sh’ma Israel” for his health and wellbeing.

5. Mark, 72 years old, Frame I – initial. Frame II – after three prayers. Frame III – There are three seeds of green apples!!!

6. Miriam, 52 years old. Frame I – initial. Shot II – after a few sips of water blessed with prayer.

7. Jeanne, 24 years old, nurse caring for the elderly. Frame I – after three, first-ever read, prayers for herself. Frame II – after four prayers for her wards. Aura has grown significantly wider and thicker.

When people offer prayers for others, their auras grow much more intense than after the prayers for their own wellbeing. Tenderness and compassion are highly prized by the LIGHT FORCES. Reward for these people is a gracious flow of light from above, reinforcing their aura and, hence, vitality. Confirmation to what has been said is this photo.

8. Nicole, 2 years and 4 months. The girl has a fright. At this initial photo her aura is punctured, full of gaps, on the bottom right – chimera.

9. Same Nicole – after seven sessions of complex treatment. Her aura gained brightness and completeness, became broad and radiant, but there still is a chimera underneath, just waiting for any imbalance of harmony in the aura. A rip in an aura may be provoked by curse words, shouting, conflict/s with other children and many other reasons.

10. Lena, 7 years old. Frame I – initial. In a weak aura there’s a big, round plasma, consisting of grains of light. Shot II – after the prayers of her parents, aura has widen and thickened considerably, became radiant and in the aura on one of the fingers appears the upper part of some unknown person’s face (there are many kinds of invisible beings, whose life takes place in various energy forms within and around us).

11. Vladimir, 44 years, his speech is full of obscenities. Frame I – initial. Shot II – not believing in God, Vladimir read three prayers with a sarcastic smile – his aura improved. Frame III – after the usual exercise in profanities addressed to his wife, his aura disappeared. In Frame IV aura of Vladimir's wife, Ida with chimeras in the form of snakes sent by her husband. In previous shots, when her husband was not around with his filthy mouth, Ida's aura was perfect.

12. Diane, 11 year old. Frame I – initial, shows deformed aura, a horrible chimerical substance that looks like a head of the Mephistopheles. A year ago, Diana had a surgery to remove a malignancy in her left temporal lobe. Diana's mother uses curse words and swears often. Frame II – after Sofia's and Diane grandmother's prayers, chimera disappeared, but the aura has not completely recovered.

13. Gladys, 26 years old. Frame I – initial. She feels good. Next to her aura we see chimerical entity, which resembles a vertical slice of a crab. Inside one of her fingers we see a claw connected with the chimera outside of her aura.

This picture shows presence of a negative for human body entities, in the space next to an aura – even in a still healthy-feeling body! A person doesn't even suspect that chimera already entered the body!

Kirlian photography allows us to register the occurrence, even prior to person's feeling any physical symptoms or changes! A number of studies indicate that Kirlianography can be used not only to the aura diagnostics. A number of studies indicate that Kirlianography can be used not just to diagnose auras (people with aura defects cannot be healthy), but also to detect a cancer in its earliest stages, including cases where cancer-triggering substances just entered the aura, but not penetrated the body yet.

14. A claw-like substances are often register next to, or inside auras of cancer patients and people who still feel healthy...

15. Sammy has two dogs at home. In the photo you can see heads of 2 dogs next to Sam's aura. Her four-legged friends invisibly remain next to her.

16. Bright glow of the aura is seen around small pits of various sorts of plums. There are many positive – angelic – substances in shapes of plasma, lightning and needlework formations.

17. Frame – I, a bottom of the flask with tap water. Frame – II, a bottom of the flask with water after it was charged by harmonious minerals. Shines up not only the water but, also, an angelic substance in the shape of a radiant ball, next to the bottom of a flask.

18. Frame – I, initial aura of Anna. Frame – II, significant expansion in her aura glow, after she had a few sips of the water blessed with prayers. A delicate angelic substance appeared over her aura.
